

INTRODUCTION

Tails hither, tails yon, once again upheld in pride and satisfaction. The feline histories which appeared in CATFANTASTIC I and II have brought suggestions from a flood of readers asking for more, especially, in some cases, about favorites.

SKitty, that unflappable space traveler, makes a second appearance. Hermione gives another detailed report on the serious duties of a reputable familiar. Drop, the bespelled cat-man, has a narrow brush with runaway magic. And Ede's earrings alter lives in a most drastic fashion while Noble Warrior upholds the honor of his royal race.

There are also newcomers who will find their own advocates, or so we believe. The venturesome felines herein range afar, but always to a purpose, and with strong effects on life, history, mere humans, and their own surroundings.
