"Readers will hail the new Heinlein book . . . with delight . . .

"John Thomas Stuart, the first, was a galactic explorer of fame. But once he went too far and brought home LummoX, then the size of an engaging puppy. John Thomas Stuart, the ninth, was the serious-minded descendant of Stuart I, and LummoX was still very much a member of the Stuart household. Too big a part, since he, she, or it now rivaled an elephant in size.

"And the problem of LummoX was not local. It was finally planetary and then galactic in scope, and had to be dealt with on the very highest diplomatic levels. The author's LummoX is more colorful than his hero, but the humor is delightful. Best of the season's offerings."
